PERSONAL PROFILE

Motivated junior fullstack developer with a Computer Science degree who **founded**, **designed**, and **developed** web applications leveraging the MERN stack. **Directed** and **led** project initiatives, **improved** application performance, and consistently **tracked** progress to meet development goals. Actively **supported** team objectives, **reported** project statuses clearly, and **raised** productivity through efficient collaboration and strong technical contributions.

PROJECTS

Chordify

📅 Date period 📍 Location

Chordify: MERN stack web application for learning guitar basics in 30 days. Features interactive quizzes, personalized learning plans, and a robust search for finding guitar chords by lyrics. Implemented secure JWT-based authentication and managed development with Git/GitHub for version control.

- Successfully developed and deployed the 'Cordify' web application, achieving full functionality within a 30-day structured learning plan. Received positive user feedback highlighting significant improvements in guitar skills and engagement, validating the effectiveness of the app's interactive and personalized learning features

Shikma - Tkuma

📅 12/2023 - 04/2024 📍 Tel Aviv-Yafo, Israel

Shikma Beer Recycling Platform (No-Code/Bubble.io): Developed in collaboration with CBC Israel to encourage recycling. Built a platform where users scan unique QR codes on Shikma beer bottles and redeem vouchers upon recycling via custom machines. Involved in end-to-end project planning, UX/UI design, and implementation in a startup team setting.

- Successfully developed and launched a no-code web platform in collaboration with CBC Israel, enabling users to recycle beer bottles through QR code scanning, resulting in increased user participation in recycling initiatives. The project enhanced brand visibility and promoted sustainability, receiving positive feedback from both users and stakeholders.

SKILLS

HTML5 CSS3 JavaScript

TypeScript React.js

Responsive Web Redux Next.js
