Summary

Fullstack developer specializing in MERN (MongoDB, Express, React, Node.js) technologies, with extensive knowledge of relational and non-relational databases (SQL, NoSQL). Proficient in JavaScript and TypeScript,. familiar with CI/CD, Docker, and Git, with the ability to solve complex problems and contribute to the development of high-quality projects in fast-paced and dynamic work environments.

Work Experience

Freelancer, Software developer, Synclable, Tel-Aviv

December 2023 - March 2024

No-code development on bubble.io of a web project for the "Shikma" beer brand in collaboration with CBC Israel, the project dealt with bottle recycling, where the person who finishes the bottle scans a unique QR code for each bottle found on the bottle label and accesses one of "Cycle's" recycling machines, where the machine Identifies the recycled bottle, then the person receives a voucher that can be redeemed at one of the selected bars and receive a free beer after recycling. Since this is a startup company, I was involved in all stages of planning until the final product and was part of a team. https://www.linkedin.com/company/synclabel

Military Service

Service in the paratroopers as a commander

March 2017 - November 2019
